PrintQInstall

ACDI Print Queue Installation Service

Let us help make set up a breeze.

ACDI Professional Services will install and configure up to ten print queues (per SKU) on your Windows, MacOS or Linux Print Server.

This is a one-time service only. Purchasing PrintQInstall entitles you to receive ACDI Professional Services for the purpose of installing print queues only. PrintQInstall does not include any post-installation support or configuration changes after print queue installation is complete

Why is it needed?

PrintQInstall is a solution for office equipment dealers who'd rather spend their time, expertise or resources on more important matters. We're ready to assist our dealers with more advanced professional services solutions. Let ACDI engineers setup and configure print servers for you.

PRE-INSTALLATION REQUIREMENTS

- Printer Names
- Printer IP Addresses
- Printer Default Configuration (e.g., B&W, color, stapling, 2-sided, etc.)
- Group Policy (Windows Deployment only*)

*In a Windows Domain environment, where all workstations are domain joined, we will assist with setting up Group Policy to get the print queues pushed out to the workstations.

FREQUENTLY ASKED QUESTIONS

What if I have more than ten printers to set up?
We can install as many printers as you need. The purchase of one SKU (PrintQInstall) covers up to ten (10) queue installations. To have more queues installed, please increase the quantity of SKUs purchased

What value-added products or services can be sold with this solution?
PaperCut, PrinterOn, or ACDI Software Installation Services.

How is this product setup?
- **Windows OS:** PowerShell script or manual setup of driver and print queues. Deployment through Group Policy, if supported.
- **Linux:** Setup of driver and print queues.
- **MacOS:** Setup of driver and print queues.

What levels of support are offered?
No support will be provided after the installation of the printers.

What won't we support?
Manual setup of print queues on end user workstations.
