

Scanshare
APPLICATIONS

WHAT IS HL7?

Health Level Seven (HL7) is an international set of standards for the exchange, integration, sharing, and retrieval of electronic health information.

These standards are designed to improve interoperability between healthcare systems, enabling diverse software applications to communicate effectively.

HL7 defines protocols for data formats, messaging, and workflows, ensuring consistent and accurate exchange of clinical and administrative data.

PROMINENT STANDARDS

HL7 standards are widely used in healthcare settings for purposes such as electronic health records (EHR), lab results, medical imaging, and billing.

HL7 VERSION 2

A widely-adopted messaging protocol

FHIR FAST HEALTHCARE INTEROPERABILITY RESOURCES

A modern, API-driven approach facilitating seamless healthcare data sharing

HL7 VERSION 3

Focused on semantic interoperability

By promoting standardized communication, HL7 helps enhance patient care, reduce errors, and streamline operations in healthcare systems globally.

Scanshare
APPLICATIONS

SCANSHARE BENEFITS

SEAMLESS INTEROPERABILITY

Facilitates smooth data exchange between Scanshare and leading HL7-compliant EHR systems like Epic, Cerner, and Meditech, ensuring consistent communication.

ENHANCED DATA ACCURACY

Minimizes the risk of misfiled or lost documents by ensuring all scanned data is linked directly to the correct patient or encounter within the EHR.

IMPROVED WORKFLOW EFFICIENCY

Enhances clinical workflows by integrating scanning and document processing into existing EHR operations, saving time for healthcare providers.

STREAMLINED DOCUMENT MANAGEMENT

Automates the capture, indexing, and routing of documents directly into patient records within the EHR system, reducing manual entry and errors.

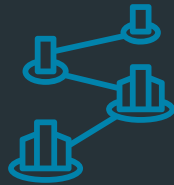

REGULATORY COMPLIANCE

Supports healthcare organizations in maintaining compliance with standards such as HIPAA and GDPR by securely transmitting and storing sensitive patient information.

Scanshare
APPLICATIONS

SCANSHARE BENEFITS

SCALABILITY

Provides a flexible solution that can scale alongside healthcare organizations as their needs and patient populations grow.

COST SAVINGS

Reduces paper dependency and associated administrative costs by digitizing and automating document management processes.

CUSTOMIZABLE INTEGRATION

Offers tailored configurations to meet specific organizational needs, ensuring the solution aligns with existing IT infrastructures and clinical practices.

REAL-TIME ACCESS TO INFORMATION

Enables healthcare providers to access scanned documents and data in real-time within the EHR, improving decision-making and patient care delivery.

ENHANCED COLLABORATION

Promotes better communication and collaboration among multidisciplinary teams by ensuring all patient-related documentation is centralized and accessible.
