

InterFAX Connector for PaperCut

Published 10/3/2024

Faxing still plays a big role in many industries today. No matter the industry, if documents need to be securely transferred from party to party, faxing is still among the safest ways of sharing documents.

Helping our partners meet the customers where they're at, ACDI has developed a fax connector between PaperCut MF and InterFAX. PaperCut MF is the number one print solution worldwide, and InterFAX is a cloud fax and secure digital workflow solution, offered globally. Leveraging both solutions helps deploy the ability to fax from any PaperCut MF-compatible device quickly and simply. With the creation of a single scan action, faxing through InterFAX can be deployed to an entire fleet of embedded devices in mere minutes.

Security Matters:

- **InterFAX security advantages**

- HIPAA and PHIPA-compliant
- PCI DSS Level 1 Certified
- Aligns with SOC 2 Type II
- Secured by TLS encryption
- Data residency in the United States, Canada, and Europe
- Has a connector with PaperCut, an ISO 27001-certified organization
