

Visualize the data in your PaperCut print management systems

Intuitive Dashboards for PaperCut MF

Intuitive for PaperCut MF is a pre-integrated BI solution designed specifically for PaperCut. Visualize the data in your PaperCut print management system. Manage costs, risks and environmental impact.

Intuitive for PaperCut is a pre-integrated BI solution designed specifically for PaperCut MF and PaperCut Hive.

Delivered with a complete set of standard configurations implemented in hours not weeks. Monthly reports for different budget holders are automated and personalised with no effort. The visual dashboards identify where you can improve the efficiency of your print infrastructure.

Benefits

Five key benefits of PaperCut dashboards.

- 1. Instantly produce** role-based dashboards with no manual effort.
- 2. Drill from a high-level overview** straight to detailed analysis with our pre-built views.
- 3. Quickly identify** high volume users, groups and departments to manage costs.
- 4. Improve the efficiency** of your print estate - easily identify under and over-utilised printers.
- 5. Highlight areas** for digital transformation with pre-built trend analysis

Intuitive Dashboards for PaperCut MF

Executive Summary

- Top 20 users & Printers, number of users, total pages, number of printers
- Rank users to see who has the most pages printed, scanned, and copied.
- See your printers with the most pages printed, indicating that they may be overused.
- Drill into top-printed documents so you can identify hotspots of printing behavior

Cost Analysis

- costs over time, by department, user, mono vs color, print vs. copy
- Average user cost by department
- Rank departments by % color pages printed and see their % weight in total printing costs
- Understand which department's printing jobs you need to analyze, which may lead to finding areas for digitization

User and Volume Analysis

- Impact of printing volumes and costs over a two-year rolling period, the split of color pages, total pages and cost
- Compare last year's print volume and costs to your current year
- Understand how changes to printing habits over a year have impacted your business
- see the impact of your print analysis over the last year

Environmental Impact

- Environmental impact of printing (CO2, energy, trees consumed) by the department over a two-year rolling period Compare your previous years' Co2 emissions, energy used for printing in KWh, and the number of trees used to your current year.
- See how your print analysis and changes to printing habits have impacted the environment
- See if you have reached your environmental targets and use data to set new ones

Intuitive Dashboards for PaperCut MF

Intuitive dashboards are available for both PaperCut MF and PaperCut Hive, providing a series of tailored dashboards presenting PaperCut reporting data in a visual, accessible, and drillable format.

Using the PaperCut MF V22.0 Data Integration feature, users can launch Intuitive from the Data Integration tab within PaperCut MF without having to switch applications. Intuitive dashboards are approved for colocation on the same server as PaperCut MF and are also available in the cloud for PaperCut Hive.

Intuitive for PaperCut Hive uses the PaperCut Hive API. The Intuitive BI Connector allows you to connect your print data from PaperCut Hive to Intuitive's pre-integrated BI cloud-based solution with a set of standard print management dashboards.
