Accessibility

Accessibility Solutions with Managed Print Services

PaperCut MF offers a multitude of accessibility options when printing. With “Find-Me printing”, you print to one queue and pick up your prints from any printer or MFD.

CHALLENGES

Printing was once simple, but with the rise of mobile devices and multiple platforms it's becoming harder and harder to manage, until now.

PaperCut MF is an easy-to-implement print management solution for users and system administrators alike. Users of mobile devices and even Chromebooks can now print to any MFD or printer. System administrators can also automatically deploy printers to users as well as provide a seamless way to set up any BYOD device.

It's one solution for any device.

In today's business landscape, organizations need to ensure printing is universally accessible across all channels and devices. With the rise in shared office space and guest printing, it's more important than ever to provide a seamless, hassle-free printing experience.

Solutions for Accessibility

Mobility Print

Quickly enable a visitor/guest, BYOD, and mobile printing. Mobility Print makes this once-daunting task incredibly easy. No more users struggling with print drivers.

Print Deploy Self-Service

IT admins can now choose to deploy printers that will automatically be installed or optionally installed by the user.

- 'Friendly' zone names that help users decide which printers to install based on where they are.
- The new Print Deploy client presents installed print queues and optional print queues and a configurable help menu.

Integrated Scanning

Provides the most common scan job settings through a consistent interface across most MFD brands. It also lets you easily control, track, and report on all users' scan actions on your devices.

Find Me Printing

Solves the problem of finding the closest printer from a long list of available printers. It is a roaming print service that allows print jobs to find users based on their physical location.

Job Panel Modification

Allows users to change their print job settings at the MFP.

Job Ticketing

Provides a simple way for PaperCut MF users to submit an order online. All the required information is collected during the ordering process through pre-configured products and options.

Benefits PaperCut Ensures

Available in your language - Interface translated into dozens of languages. A truly global product.

Secure printing - PaperCut has you covered with over a 100 integrations across the most popular payment gateways, document storage systems, and accounting systems.

Scalability - Go from 5 to 500,000 users without a hitch and mix your fleet with support for 25 different printer brands, more than any other solution.

Freedom of Choice - Pick any operating system and any host environment (on site or self-managed or the cloud) - all synced against an Active Directory or cloud directory like Google Sync and Microsoft Azure.
