

OVERVIEW

# Accountability

# Increase Accountability with Managed Print Services

PaperCut represents a significant leap forward in the ability to provide companies more transparency into their print environment by gaining user accountability.

## CHALLENGES

PaperCut enables administrators to worry less, especially if they have users printing sensitive material that could be misused or end up in the wrong hands. Some users seldom know what device their printing to which could create not only costly errors but even damaging printing habits. PaperCut is a unique solution for organizations that struggle with the individual, departmental, and/or company wide user print accountability.

PaperCut helps organizations be accountable to each other, as well as to the environment. Let's not forget how corporate responsible it is to use software like PaperCut, which saves millions of trees each year globally. Technology has enabled companies the opportunity to shape the future by each one of us doing our part.

Print accountability enables you to set quotas on pages printed, set up user ID restrictions for tracking of print jobs, track printing costs by departments or individuals and set up payment requirements for printing. The best part if all of this can be serviced through cloud print management.

# Solutions for Accountability

## Web Based Administration

All data is available in the same place, even from remote print servers or locally attached printers. The same features and settings are available from anywhere you feel like logging in. Access the system from anywhere on the network using a standard web browser.

## 80+ Built in Reports

Your one-stop shop for one-click reports. From what people print to how they impact the environment, our one-click collection has your reporting needs truly covered.

## Shared Accounts

Organizations such as legal firms, engineering firms, or accounting office's often have long lists of accounts, projects, clients, or matters. It is not uncommon to see more than 10,000 accounts, and some organizations run in excess of 300,000 accounts.

## Client Billing

PaperCut MF includes the advanced Client Tool option as standard for all users across all license options. In PaperCut NG, the advanced Client Tool option is only available in the professional client billing licensing option. It is specially designed to suit organizations making heavy use of the account charging features in PaperCut.

## Authentication/G Suite Integration

Google for Education schools, G Suite fanatics, and Chromebook-based businesses now experience easy user management with PaperCut's G Suite and Cloud Identity integration. Save on labor,

hardware, and support costs with no need for on-premise Active Directory. Save time and hassle with single sign-on for users and admins.

## Watermarks/Digital Signatures

Watermarking is a feature that allows you to print a small portion of text to the top or bottom margin of every page. Typical uses of watermarking include adding a username to the bottom of every page to help identify the owner. Writing job metadata in the footer such as print time, printer or document name. Applying a digital signature to help track and verify documents.

## Print Archiving

Find Me Printing/Secure Printing - No-fuss print retrieval for users through "Find-Me" printing features. Simply print to one queue and pick up your prints from any printer or MFD.

## Benefits PaperCut Ensures

**Easy printing** - Print management software that's helping hundreds of millions of people around the globe to minimize waste while having a secure and easy printing experience.

**Secure printing** - Avoid data loss with secure print release / Find-Me printing can help stop a shared printer being your next data leak or potential compliance risk by introducing a secure hold-and-release queue.

**Waste control** - Although PaperCut can do far more than just save paper waste, that's still what we and our customers are most passionate about.

**Easy scanning & capture** - Our scanning software works on all MFD makes and models, out of the box, with a consistent, super slick touch-screen interface and a one-click scanning action that shows a snapshot of what's been captured.
