

ACDI

INTEGRATION SOLUTIONS

ACDI Value

Let ACDI take your PaperCut solution to the next level with a 3rd party integration. An ACDI integrations specialist will work with your team to create a seamless integration and workflow that best fits your business practices. ACDI will schedule a pre-installation consultation meeting to develop an action plan. Once we're confident that we know what you need, we will create the integration, roll it into implementation and then train and support your team.

3RD PARTY SOFTWARE INTEGRATION WITH PAPER CUT BY ACDI

A customized configuration facilitates the automation and sync of client and matter data directly with PaperCut's Shared Accounts. Scheduled reports for import via import feature can be delivered daily, weekly, or monthly based on the billing cycle, eliminating the need for manual transaction entries.

Top Software Integrations Completed By ACDI

Are these the only software that can be integrated? Not even close! We hate to sound braggy, but we have a massive list of our 3rd party integrations available. ACDI also offers [customized integrations](#); if we do not list your 3rd party software, our complete list.

WHAT ARE THE BENEFITS?

- Eliminates Wasted Employee Time
- Eliminates Human error
- Creates Consistent Data Input and Output
- Automates mundane tasks
- Updates Client/Matter/Customer/Project List information
- Custom Integration of data to fit your needs
- Validation of data
- Supports Multiple Accounting and Expense Codes
- Consistent Data Conversion
- Scheduled reporting in daily, weekly, or monthly intervals

WHO ARE INTEGRATIONS FOR?:

- Any organization that uses billing software for clients such as Law Firms, Architects, Construction Companies, CPAs, Real Estate Firms, and generic service providers.
- Universities or Public Libraries utilizing payment systems, whether physical or online, to pay for a la carte services.

HOW DO INTEGRATIONS WORK?

1. Client Data is exported from existing 3rd party software for import into PaperCut.
2. PaperCut tracks usage of print, copy, scan, and fax usage.
3. Data is exported out of PaperCut and converted to match the needs of the 3rd party software.
4. After the data has been converted, it is then imported back into the 3rd party software.
