

OVERVIEW

# Education K-12

# Top of the class in easy, cost-effective printing for K-12

Whether it's elementary, primary, junior, grade, middle, or high school, simplify printing campus-wide to maximize budgets and focus on what matters most: education.

## CHALLENGES

Schools want to print with minimal IT involvement, complete visibility, and top-notch security. Moreover, it all needs to be easy for students while promoting sustainable, cost-effective habits.

So if a K-12 environment has...

- GSuite/Chromebooks
- Minimal IT Staff
- Support requests racking up more hours than the day allows
- Sensitive documents that need securing before, during, and after print

**PaperCut MF is the solution for you.**

*"I would absolutely recommend PaperCut. The ease of use, the end-user experience, it's second to none as far as I'm concerned. Over the last fourteen months we've saved over 10,000 in unreleased paper savings alone."*

Lisa Payne - Desktop Network Specialist, Little Rock School District

# Solutions for Education

## G Suite Integration

PaperCut is a Google for Education premier partner, which means when it comes to caring for printing in education, PaperCut is the best. PaperCut MF is the first enterprise print management solution to fully integrate with G Suite, hurdling the most common printing obstacles found in Google printing environments – and making its strengths even better.

PaperCut MF lets you sync users directly from G Suite, which means SysAdmins only need to manage a single user pool, and users themselves can log in easily with their Google credentials. Whether mobile, BYOD, or managed device, your printers will pop up automatically without fail.

Better yet, you don't need to worry about which drivers to deploy for different operating systems – it's all taken care of. Securely manage all your scanning in one place and send documents straight to a Google Drive folder – all using a simple tap-and-scan workflow.

## Mobility Print

PaperCut's Mobility print manages forty million students in the U.S. use Chromebooks, 7 million of those Chromebooks. Mobility print enables printing without the worry of occasional dropouts that require system reboots.

It's not just print enablement, it's learning enablement, device enablement, and print management made simple. It's not just for Chromebooks either. Mobility Print is compatible with Apple iOS, Android, Chrome OS, Windows, and macOS. Students and Staff working virtually? No problem! Mobility Print's Cloud Print feature allows users to securely print over the Internet and pick up their print jobs from their office or school.

"Within 10 minutes, Mobility Print was installed on all our Chromebooks...I didn't deal with a single Chromebook printing issue all year." Dallastown Area School District

## Print Deploy

Installing printers is simple enough if you have one print queue on your home computer. But in a managed network with loads of users, heaps of printers, and a mix of operating systems in far-flung locations, things can get tricky! As a network administrator, it's essential to have the best tools to get the right print queue to the right person in the right location every single time. These printer deployment options will make life easy for both SysAdmins and end-users alike.

## Security

Businesses spend billions on IT security and firewall protection every year, but some of the biggest (and simplest) security wins sit right under our nose at the printer. It all begins with a fundamental understanding of a print job's journey from submission to collection. For most companies, the path to a strong security culture is taking incremental steps that make a difference to staff's daily work-life. Security-related solutions can help here. Combining security-related solutions with cultural change is the secret to success. For example, a simple task like having to sign into a printer could cause a user concern if they don't understand its benefit. But if they understand the environmental benefits such as saving paper, toner, and power, you have a much more compelling case for cultural change that people will buy into.

# Solutions for Education

## **Storyboard**

Storyboard pulls in all your disparate business data and displays it in an organized, easy-to-digest, and elegant dashboard. With powerful, customized filtering options, you'll see your data like you never have before – the way you want it.

## **Scanning and much more**

Convert documents to text searchable and editable digital documents. Find what you need, and make any changes to scanned information fast. Digitizing your documents has never been easier, with PaperCut's built-in features for scanning and on-prem OCR.

## **Touchless Release**

Minimize exposure to device surfaces that could be a hot-bed for germs. With a card reader and proximity cards or key fobs to authenticate at the device, you can configure your device to automatically release all print jobs without having to select any additional options. Another convenient option is to utilize the Mobile Print Release feature, allowing users to release their held print jobs from their mobile phones. Combine mobile release with QR codes to provide a powerful touch-free solution for printing.

## **COVID Funding for K-12**

20% toward learning loss and returning to in-person schooling

- Purchasing hardware and software needed to conduct remote/hybrid learning
- CDC safety requirements for on-site learning
- State-by-state breakdown for K-12 funding

## **Additional Features**

### **Authentication**

Peace of mind knowing the right individual picks up print jobs with multiple authentication methods for users and document security.

### **Dashboard Management**

Access all the information needed about the print environment on the web-based admin dashboard.

### **Vendor Neutral**

PaperCut supports all setups, sizes, and mixed environments like mac/windows to facilitate change and flexibility.

### **Find-Me**

Users can securely print their jobs at any enabled MFP with authentication, which also helps eliminate the need for Staff to worry about what printer to print to; just use the find me queue.

### **FERPA Compliance**

Keep personal information personal with the secure print release feature of PaperCut.

### **Rules-Based Printing**

Redirect print jobs to more cost-efficient devices.

### **Quotas**

Choose an allotment of balance to give to students and faculty. It gives the ability to show awareness and accountability.

### **Support**

Installation, implementation, configuration, training, and support all delivered by ACDI's award-winning team of experts.

### **Print Policies**

Curb the printing environment by managing users based on supported behaviors, i.e., B/W, Duplex, per application, Etc.
